Environment Policy

Apollo Plumbing and Gas is committed to minimising the impact of all aspects of its operations on the environment to a statutory and socially acceptable level through the pro-active implementation, maintenance and continuous improvement of our Health, Safety Environmental Management systems.

We are committed to managing our operations and services in an environmentally responsible manner and we will develop and implement policies and procedures aligned to the international standard ISO 14001.

To deliver on our commitment, we will:

- Minimise the impact of all our activities on our surroundings
- Recycle and reuse products wherever possible
- Promote water and energy saving products
- Reduce the quantity of polluting substances discharged into the environment
- Control the use and disposal of chemical substances
- Use modern equipment and technology in place of those considered harmful
- Increase the use of environmentally acceptable materials
- Encourage environmental awareness amongst consumers

It is every employee's and contractor's responsibility to minimise their impact on the environment and to ensure that they are aware of the environmental management requirements and raise any issues or concerns regarding them.

Byron Bennett
Managing Director
